

TITO KARANGU

Technical Event Director & Creative Producer

Nairobi, Kenya | mburutito11@gmail.com | wa.me/254714617606 | github.com/Coyotito7

PROFILE Dynamic Technical Director and Full-Stack Developer specializing in the intersection of live event production and digital experiences. Proven track record in orchestrating complex stage workflows, directing technical teams, and engineering robust mobile applications. Founder of Bunka Entertainment, blending high-end creative vision with rigorous operational execution.

LIVE PRODUCTION & EVENT MANAGEMENT

Technical Director & Event Producer | *Camp Fearless* | Aug 2026

- Directed end-to-end technical operations for a major live event, acting as the primary hub between media teams and stage personnel.
- Engineered comprehensive technical cue sheets, operational guidelines, and program schedules to ensure flawless stage transitions.
- Managed real-time broadcast and visual components, maintaining high-fidelity output under live-wire conditions.

Founder & Lead Organizer | *Bunka Entertainment* | Jul 2026 – Present

- Founded an avant-garde event production company focused on premium experiential concepts in Kenya.
- Spearheaded "The Coterie – Installation 001" (Nov 2026), a high-concept event merging high fashion and Afro house music.
- Negotiated brand partnerships, artist contracts, and venue logistics while designing dynamic ticketing structures and promotional campaigns.

Communications Director | *Daystar University Model United Nations* | Jun 2026 – Aug 2026

- Orchestrated all official chapter communications, inter-university collaborations, and large-scale recruitment events.

SOFTWARE ENGINEERING & PROJECTS

Full-Stack Developer | *Zuru* | Jun 2026

- Designed and developed a location-based mobile and web application for discovering and reviewing local Kenyan businesses.
- Architected the backend using Supabase and PostgreSQL, implementing PostGIS spatial queries for precise location-based routing.
- Built the frontend in Flutter and Dart, integrating QR verification systems for business check-ins.

Full-Stack Developer | *Taste Trail* | Mar 2026 – Apr 2026

- Engineered a dynamic restaurant rating application utilizing Flutter, PHP, and MySQL.

- Integrated the OpenStreetMap API to provide users with accurate, real-time spatial data and routing.
- Developed secure backend PHP scripts to handle database connections and user data rendering.

TECHNICAL ARSENAL

- **Software Development:** Flutter, Dart, PHP, SQL, MySQL, Supabase, Google Apps Script.
- **Production & Creative:** OBS Studio, DaVinci Resolve, CapCut, Affinity, Canva, Higgsfield AI.
- **Systems & Environments:** Linux (Mint, Nobara), Android Studio, WebStorm, Git/GitHub.

EDUCATION

B.Sc. Computer Science | *Daystar University* | Athi River, Kenya
